LITTLE ITEMS OF LOCAL INTEREST

Mr. Ed. Young, of Penticton,
arrived on Monday and is the guest
of Mr. and Mrs. H. Elliott.

J. W. Baird came out from Cal-
gary on Monday and took in the
Old Timers Celebration Monday
night.

Mr. Willis, a Carbon old timer,
arrived last week and has taken over
the management of the Frico
Store.

J.R.E. Coburn was a Calgary vi-
sitor this week.

Geo. Wise has opened up a Gro-
cery on front street. Advertis-
ing is the back-bone of all industry,
George.

Mr. and Mrs. S. Garrett left yes-
terday on a six weeks' visit to Vic-
toria.

Dick Gimble has returned and is
again employed in the Garrett gar-
age.

Bill Olive motored out from Cal-
gary on Monday. The warm wea-
ther the past month has put the
roads in fair shape and motor traf-
fic is becoming general.

E.A. Best left last week for Vic-
toria, where he will probably reside
in future.

Jack Dimmer left on Wednesday
for his home in Trochu, and will
go back on the farm. He has left
Carl Lind of Calgary to look after
the pool room here.

On Wednesday evening, Feb. 1,
Mr. and Mrs. Talbot were the host
and hostess at a jolly party given
at the home of Mr. and Mrs. Leon
Coates. The evening was spent in
cards and dancing, over one hun-
dred people being present. Barrs'
orchestra played the music for the
occasion.

Mrs. Jas. McLeod is seriously ill
at her home here and on Wednes-
day a nurse arrived from Calgary to
look after the patient.

D. Code returned on Friday last
from Trochu.

Verling Moorehouse is critically
ill with the flu.

L. Poxon was a Calgary visitor
this week.

Joney Fleck leaves today for a
trip to North Dakota.

Rev. and Mrs. C. B. Oakley are
Calgary visitors this week, attend-
ing a meeting of the Presbytery.

Posters are out for the Frico
Store February Clearance Sale; the
sale commences Saturday.

The oratorical contest, which is
sponsored by the Calgary Herald
and the Edmonton Bulletin, is be-
ing contested in Carbon. The time
limit in which the debates must be
finished is, in Carbon, which is the
center, March 16, and in the dis-
trict by April 6.

J.A. Grenier, of Hesketh, was a
visitor in Carbon on Wednesday.

The Carbon School report will
be published next week.

FRIDAY, FEB'RY 17th**

**BARR'S ORCHESTRA
Supper at Midnight**

ADULTS 75c :: CHILDREN 25c

BIG CROWD AT OLD TIMERS' "SOIREE"

One of the largest attendances of
the Old Timers Association was
present at their fourth annual cele-
bration, which was held in the Far-
mers Exchange hall on Monday
night, Feb. 6th.

The first part of the evening was
spent in cards and the prizes were
awarded as follows: Ladies first,
Mrs. F. Gibson; second, Mrs. J.
Gordon; third, Mrs. Wilson and
consolation, Bessie Cunningham.
Men's first, J. Ramsay; second, W.
Levens; third, E. Hester and con-
solation, Carl Jennings.

After the prizes were awarded to
the winners by the president, Ross
Thorburn, dancing was commenced
and the program consisted of old
time dances of many descriptions.
At midnight a refreshing luncheon
was served, following which Ross
Thorburn gave a review of the Old
Timers activities; Also a short
address by Dan Code, Sec.-Treas.
F. Poxon read the minutes of the
previous meeting and reported on
the work done during the past year.
Following this, officers as follows
were elected for the year 1928:

President, Ross Thorburn
Vice-Pres. Jas. Gordon
Sec.-Treas. Robt. Shaw
Committee: Mrs. Van Loon and
Mrs. McFarlane.

After the business for the evening
was disposed of dancing was again
in order and the Old Timers domi-
nated far into the morning, prov-
ing that they were still equal, if
not superior to the younger genera-
tion.

A big blue-blooded cow gently
strolled up to our front window on
Tuesday afternoon and gazed at ye
editor as he systematically placed
the type in a 'stick' with the old-
time click-click of a "type-artist."
Just what mother cow was think-
ing about, we do not know, unless
it was sympathy for one of our
trade, but if she knew just then
that our ever watchful eye was
upon her and that it was our duty
to remind folk that there is a pound
law, she probably would not have
ventured near this editorial sanc-
tum.

Announcement

We wish to announce that we have taken over the business, with
stock and equipment, of D. F. McKinnon, Funeral Director of Carbon,
and that we will open an office in Carbon.

Mr. Guttman, of the Carbon Trading Co., will act as our represen-
tative in Carbon.

Phone calls will receive personal and immediate attention.

Canada To The Fore

Canada's amazing progress in the last few years is challenging the attention of the world. That progress is based not only on the great variety, extent and richness of this country's natural resources, but is founded in the renewed faith of Canadians in their Dominion and in the confidence they have in themselves, a faith and confidence born largely of the really tremendous achievements of Canada during the years of the Great War. In that time, struggle the people of Canada showed wonderful energy, displayed great initiative, unsurpassed organizing ability, and hitherto undreamed of powers and strength. Thrown to a large extent upon its own resources, financial and otherwise, the Dominion courageously faced all problems and did so with marked success.

Few countries, if any, weathered the stormy days and difficult conditions of the after-the-war and reconstruction years as successfully as did this Dominion. Canadians became conscious for the first time of their national strength; the people discovered their national soul. Their former doubts and timidity, their self-depreciation, and what has commonly been termed their inferiority complex, disappeared, and has been replaced by courage, confidence and superb faith.

In former years it is true, Canadians had successfully grappled with large and difficult domestic problems, but, in these more recent years, the Dominion has boldly taken its place in the world arena. Its position today in the Councils of the League of Nations is an outstanding one, its place in the Commonwealth of British Nations is strong and assured. The score of more nations constituting the Pan-American Union, including the United States and the countries of Central and South America, are anxious that the Dominion should join them and give added strength and prestige to the Union, while other nations are encouraging the establishment of direct diplomatic representation with this country.

But even yet it is doubtful if many Canadians fully realize the rapid growth and steadily increasing power of their own country, because, as a rule, the average citizen pays little attention to so-called dry statistics in which the growth of a country is set forth. In a recent speech at Winnipeg, Mr. E. W. Beatty, president of the C.P.R., succinctly and impressively set forth a few facts, which will bear repeating. He noted, for example, the following:

Every working day last year Canadians took from their forests, products valued at \$1,500,000.

From mines they took \$289,000 daily.

Every working day they increased their capacity for manufacturing pulp and paper by 1,000 tons. Canada now manufactures one-third of the world's requirements of newsprint.

Every working day they added 700 horsepower in hydro-electric energy to the power already installed, and at the same time began work that will add 1,000 h.p. every day in the first six months of 1928.

Canada's export trade last year, with less than 10,000,000 people, was equal to the export trade of the United States, when the latter country had a population of 75,000,000.

Commenting on these and other statements in Mr. Beatty's striking survey, a Winnipeg paper asks: "Is it any wonder that in the past two years the Canadian people have been putting \$200,000 into the savings banks every banking day, increasing deposits in other financial institutions correspondingly, investing in life insurance at the same relative rate, buying back millions in securities formerly held in Great Britain and Europe, providing almost unlimited capital for sound industrial enterprises, and have acquired a spirit of solid confidence and self-reliance?"

Nor is it surprising that more people are emigrating from the British Isles to Canada than to any other country, many thousands more than to Australia.

Speaking at the opening of the great 5,500,000 bushel terminal elevator just completed by the United Grain Growers at Port Arthur, President T. A. Cramer predicted that, while Canada was now producing approximately 500,000,000 bushels of wheat annually, and is today the world's greatest wheat exporting country, production would be further increased until this Dominion would be producing one billion bushels of wheat annually.

And the thought for Canadians to keep ever in their minds, and to profit by, is that Canada is only just beginning to get into its stride.

Suggests Cure For Criminals

Physician Would Combat Crime By
Use Of X-Ray

A sentence of "under the ray" instead of the gallows or a drab jail would be meted out to criminals if a group of Wholesome physicians made practical their theory of combating

A Man of Rare Attainment

Honored politically and professionally, during his lifetime, Dr. R. V. Pierce, whose picture appears here, made a success few have equalled. He was the originator of that great herbal tonic, Dr. Pierce's Golden Medical Discovery, the sale of which has, each succeeding year, been greatly increased.

When you feel weak, tire easily, become discouraged quickly and sometimes feel like giving up the struggle, just ask your nearest druggist for Dr. Pierce's Golden Medical Discovery, or "G.M.D.," in fluid or tablet.

Cures everywhere laud its praises. Send 10 cents for trial pkg. of tablets to Dr. Pierce's Laboratory in Bridgeburg, Ontario.

crime through the medium of the X-ray.

The experimenters, headed by Dr. R. J. Hersey, have revealed that for some time they have studied a method consisting of dissolving the thymus gland with the X-ray.

Dr. Hersey said their work tended to show there is a certain gland near the throat of small children which should vanish as the child grows up, but they found it in many criminals and insane persons. It is their theory that this ductless gland causes such persons to be abnormal and that the trouble can be eradicated with the X-ray.

After studying the faces of Nathan Leopold, Richard Loeb and others, Dr. Hersey said he found in all of them the tell-tale characteristics of gland cases.

Alberta Cattle For U.S.

According to figures compiled by Samuel C. Reat, American Consul at Calgary, more than \$300,000 worth of cattle from Alberta were exported to the United States between July 1st, 1927, and November 30th. Approximately 12,000 head of stockers, feeders and butcher cattle were shipped south, 1,449 being invoiced through Lethbridge.

World Wheat Pool Conference

Will Be Held In Regina On June 5, 6 and 7

Preliminary arrangements for the third international wheat pool conference were discussed at a meeting of the international conference committee held here in Winnipeg recently.

The conference will be held in Regina, June 5, 6 and 7, and it is expected all the important wheat exporting countries of the world will be represented.

No statement was made concerning the preliminary plans discussed recently, but it was announced the committee would meet again in May to arrange final details.

FOUND A HEALTH BUILDING TONIC

A Nova Scotia Lady Was In An
Anaemic Condition

Men and women who do not sleep well and are not refreshed and strengthened by a night's rest, are generally suffering from thin, watery blood. The nerves fail to get the nourishment they demand and headaches and a worn-out feeling is the result. Building up the blood is the one sure step to renewed health and strength, and for this purpose nothing else can equal Dr. Williams' Pink Pills. From first dose to last they enrich and purify the blood, and in this way promise better appetite, better rest at night, and renewed strength.

Mrs. Mary E. Uhlman, Williams-town, N.S., writes: "I have received so much benefit from Dr. Williams' Pink Pills, that I would feel myself ungrateful if I did not let you know."

I was in a very poor state of health and reached the stage where I had to remain in bed. A doctor was called in and he told me I had no organic trouble, but was simply run down from overwork. I had been left with a family to support, which I did by dressmaking. The doctor said my blood had almost turned to water, and advised a rest cure. I did not see how it was possible for me to take a very long rest, so I decided to try Dr. Williams' Pink Pills. Soon I found my strength returning and before very long I was able to go about my duties as usual again. This was a few years ago, and my health remained good until about a year ago, when I broke out with humor of the blood. Again I consulted the doctor, who said my blood had become so thin that it had really poisoned itself. I told him I had bought several boxes of Dr. Williams' Pink Pills, and he told me to go on taking them as he thought they were just what I needed. I took eight boxes and again was in good health. I can therefore recommend these pills to all in a weak or run-down condition."

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail, post paid, on receipt of price, 50 cents a box. Try them today.

Two Trophies For Aviation

Awards For Greatest Feat Of 1927
Exclusive Of Stunting

Two important aviation trophies for the airmen considered to have done the greatest feat of the year 1927, exclusive of stunting, are to be awarded.

One is being given by the Department of National Defence and the other by the International League of Aviators. The latter trophy is accompanied by a cash prize enabling the winner to take part in international aeronautic events. The aviation League of Canada is charged with the choice of the winner.

The name of Captain F. Stevenson, former pilot of the Western Canada Airways who attained the record of 800 hours flying last year is mentioned in connection with the government trophy. Captain Stevenson was killed recently near The Pas, Man., but it is believed a posthumous award would be in order.

Good Market For Milk Products

It is estimated that the production of milk and milk products in Canada is worth \$250,000,000 per annum at the present time. The prospects of two markets for Canadian producers, the old established one in Europe and the new one in the United States, makes the outlook for the industry decidedly rosy in the opinion of the Dominion Dairy Commissioner.

Negro Becomes Wealthy

Tom Johnson, 54, a negro plasterer, of Mayfield, has been informed by an attorney from Tulsa, Okla., that he is owner of a quarter-section of land there upon which are located forty or more producing oil wells, and thus his wealth ranges somewhere between ten and twenty millions.

Radio Telephone Links

Winnipeg and London

Conversation Carried On Between
Western City and Mother
Country

Linking up the gateway of Western Canada with the mother country, a trans-Atlantic radio telephone conversation between Winnipeg and London, England, has been successfully carried out. For 15 minutes an official of the Manitoba Government Telephone System conversed with a member of the London postal telephones. So clear was the reception that the London official complained of the tap-tap of the telegraph ticker in the Winnipeg office.

"For heaven's sake stop that telegraph ticker in your room, it is deafening," he said to William Walton, long distance chief of the Manitoba telephones.

The call as it came to Winnipeg, a distance of about 5,000 miles, passed through New York, Chicago, Minneapolis and Fargo, N.D.

New Anti-Aircraft Gun

Weapon Has Vertical Range Of Three
Miles

A new three inch anti-aircraft gun and mobile mount has been designed by the ordnance department of the United States army and adopted by the war department.

This new weapon is capable of sending 25 shots a minute almost three miles straight up and its horizontal range is more than twice that distance. Its mobile carriage presents the latest developments, combining stability and mobility, and can be placed in readiness to fire in 15 minutes from a carrying position. It is so light that it can be moved across the country by a standard four wheel drive truck.

Filling Up Vacant Spaces

53,000 New Colonists Added To
Canada's Population In 1927
Through C.N.R.

Approximately 53,000 new colonists were directly added to Canadian population in 1927 through the instrumentality of the Department of Colonization and Development, Canadian Pacific Railway. Of these roughly 35,000 moved directly through channels created by the Department into agricultural or domestic service, farm training or farm ownership. Settlers moved from the United States by the Department's organizations totalled 11,000, practically all of which are established on farms.

LESSON No. 14

Question: Why is emulsified cod-liver oil so efficient and so beneficial a food-tonic?

Answer: Because it is so easily assimilated and quickly builds up strength. Multitudes use it every day as in

SCOTT'S EMULSION

Reach Better Understanding

Friendly Relations Between North
and South Of Ireland

Viscount Craigavon, premier of Northern Ireland, in a speech at Belfast City Hall, said he was glad to state that friendly relations between the Irish Free State and Northern Ireland are growing better every day.

It is the desire of all citizens, he said, that they should have only the best relations with such close neighbors.

Miller's Worm Powders will eradicate the worm evil that bears so heavily on children and is believed to cause many fatalities. They are an acceptable medicine to children and can be fully relied upon to clear the food channels thoroughly of these destructive parasites and restore the inflamed and painful surfaces to healthfulness. They are an excellent remedy for these evils.

The total crop of coca of the South American countries for last year exceeded 75,000,000 pounds.

Only the uninformed endure the agony of corns. The knowing ones apply Holloway's Corn Remover and get relief.

More than three-fourths of the corn leaves raised are consumed by the native Indian population.

Woodsmen—Keep Minard's handy.

In New York City alone it is estimated that 100,000 women daily have their hair marcelled.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

**Physicians prescribe Aspirin;
it does NOT affect the heart**

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Minard's Liniment for asthma.

the wise man loves the girl he mar-
ries.

That the interest aroused in the New Chevrolet has been well merited is indicated by these first photographs of this latest addition to the light car field. The smart sport cabriolet, with its folding seat and disc wheels, is shown in the upper right-hand photograph. In the centre is the sturdy Chevrolet one-ton truck chassis, while at the lower right is the coach model, the body of which is five inches longer than formerly. Insets are: upper left, the massive new radiator and heavy full crown fenders; right, the powerful and clean-cut motor of the new line, with two-port exhaust and complete enclosure; lower left, a view of one of the four-wheel brakes. The New Chevrolets, which are to be reduced in price, are to be available at once. They are longer and roomier than previous models.

TWENTY-ONE YEARS

It is over twenty-one years since this Farmers' Company began business. Now, with its twenty-one years of experience, it is in a better position than it has ever been to give valuable service to farmers of Western Canada.

Empire's Smallest Island Asks for Help

EMPERESS OF FRANCE

TRISTAN DA CUNHA

BEACH SCENE, TRISTAN DA CUNHA

From King George and Queen Mary down to the lowliest of their subjects throughout the Empire, interest has been excited in the distant and isolated island of Tristan da Cunha in the South Atlantic by the voyage of the Canadian Pacific Liner Empress of France on its first African-American cruise in the course of which the vessel will touch at the island. Hardly one ship in a twelve-month comes anywhere near the island and the advent of one which carries with it every facility of modern luxury is an event which will certainly be unique.

The 140 inhabitants of Tristan da Cunha will have a treat in store as presents have poured in to the offices of the I. O. D. E. for them. These include timber and

nails which are being sent on the recommendation of Captain S. Vint, old-time mariner who lives in Montreal and who recalls days when he sailed near the island and the inhabitants put off in boats and begged for wood and copper nails. Other gifts are books, magazines, clothing, gramophones and records and particularly a powerful radio set which will keep them in contact with the outside world.

No ships can dock at the island and the Empress on her passage across the 3773 miles of ocean that separates Buenos Ayres and Cape Town will stop about half way within sight of the island and will raft to its inhabitants the gifts of the outside world. This will be done about the last week in February.

The people are self-governing and self-supporting. The men are daring seamen and clever carpenters and masons, but there is a touch of the primitive about the picturesque bullock-carts and the cottages built of huge blocks of stone. High cliffs circle the lonely island and are pierced with ravines, the walls rising like ramparts from the sea to a height of over 1,000 feet. They are topped by a central cone that stands out amid the surrounding cliffs at a height of 7,640 feet, snow-capped and symmetrical as the Peak of Teneriffe. The island has only been in continual occupation since 1817, although discovered in 1506 by the Portuguese Admiral Da Cunha.

CHILBLAINS

Zam-Buk soon allays the inflammation and swelling, soothes the itching pain, and restores the maddening irritation. Where skin is broken, festering, ulcerated Zam-Buk is doubly valuable because of its great healing and antiseptic power.

Zam-Buk

WORLD HAPPENINGS BRIEFLY TOLD

A contract for construction of a grain elevator has been let by the New Westminster Harbor Commission. The cost of the elevator will be about \$500,000.

The establishment of a department for the promotion of peace and international understanding is advocated by Miss Agnes MacPhail, Progressive, Southeast Grey.

Hon. C. A. Dunning, Minister of Railway, introduced in the House a bill to provide for the construction of a line of railway between Rosedale and Bullpound, Alberta.

Patrick Murphy, aged 44, was added to the list of victims in Winnipeg when he was found dead in a bed in a rooming house, as the result of drinking wood alcohol. He is the 13th victim within the past two months.

Sir Robert Borden was chosen president of the National Council of Canada, Institute of International Affairs, at the first annual meeting held in Ottawa. John W. Diefenbaker, Winnipeg, was elected vice-president.

Professor Johannes Fibiger, winner of the Nobel Prize for medicine in 1926, who was on the faculty of the University of Copenhagen, was awarded the prize for his work in cancer research.

The scope of treaties arrived at by the Pan-American conference has been widened to include the world instead of the U.S. and two Latin-American republics. The treaties involved are those dealing with commercial aviation.

Admirers of many nationalities attended the funeral of Vicente Blasco Ibanez, noted Spanish author, who died at Mentone, France, in voluntary exile. A company of Alpine chas-seurs—the famous blue devils—rendered military honors.

For Scalds or Burns.—Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and adds a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinary's fee.

Special Kinds Of Bricks

Sand-lime bricks, clinker blocks, and cement blocks are made at many points in Canada, both in competition with ordinary clay bricks and pressed bricks, and also for use in localities where ordinary bricks are not available except at relatively high cost.

Britain Is Following

Disarmament Plan

Have Decided To Abandon 10,000 Ton Vessels For the Present

The British Government, it was announced at London, has decided to go still further in its policy of naval disarmament indicated after the failure of the tri-partite conferences.

The building program passed in 1925 provides for the laying down of one 10,000-ton cruiser and two 8,000-ton cruisers in each of the three years, 1927, 1928 and 1929. The First Lord of the Admiralty, Right Hon. W. C. Bridgeman, recently announced that it had been decided to abandon all the 10,000-ton vessels for the present and that one of the projected 8,000-ton ships might be carried over until 1928-29. Now it has been determined to abandon the latter vessel altogether.

The net result is that in the two years in question only three 8,000-ton vessels will be laid down, instead of four in this class, as originally proposed. Together with the elimination of the 10,000-ton ships, this will mean the saving of about \$5,500,000 (\$27,500,000). It is understood that the program for destroyers and submarines will remain unchanged and that construction of nine destroyers and six submarines will be included in next year's program.

VICKS VAPORUB

OVER 21 MILLION JARS USED YEARLY

Was Great Shopkeeper

Large Business Built Up In England By John Sainsbury

John James Sainsbury, founder of Messrs J. Sainsbury, provision merchants, who has died at his home at Highgate, N., London, Eng., at the age of 83, is described as one of Britain's greatest shopkeepers.

He started as a boy in an oil shop in Drury Lane, and when he married at the age of 21—59 years ago—he opened a cheese-monger's shop in the same street. He lived to see this tiny shop develop into a colossal business, which owns more than 100 shops in London alone, and many more in the provinces.

This business is estimated to be worth nearly £1,500,000 (\$7,500,000), and it is still in the Sainsbury family, all the shares being held by Mr. John's six sons and six grandsons.

From the time when Mr. Sainsbury began to make his Drury Lane shop a success he could never be tempted to buy anything other than the best, and this, combined with the facts that he tried always to present his goods in the most attractive way and to have them sold by the most attractive assistants, accounts for his success.

Receives Handsome Gift

Self-Made Millionaire Gives Year Income To University Of California

P. Giannini, born 17 years ago in a humble rooming house in San Jose, Calif., of poor Italian parents, has placed his 1927 income, \$1,500,000, at the disposal of the University of California.

Under the terms of the gift \$1,000,000 goes towards the establishment of the Giannini foundation of agricultural economics, and \$500,000 will be used for the erection of a building on the university campus in Berkeley, dedicated to ways and means of relieving and improving the economic condition of farmers, dairy and livestock men and fruit growers in California.

Exhausted From Asthma. Many who read these words know the terrible drain upon health and strength, which comes in the train of asthmatic troubles. Many do not realize, however, that there is one true remedy which will usually stop this drain. Dr. J. D. Kellogg's Asthma Remedy is a wonderful check to this enervating ailment. It has a countless record of relief to its credit. It is sold almost everywhere.

Feldspar Of High Quality

Canadian feldspar enjoys a well-merited reputation in the economic industries, being of high grade and of uniform potash content, analysis of samples from a number of quarries showing a potash content of about 12 per cent.

Some scientists think that the rings around the planet Saturn are composed of large masses of dust particles.

A false friend and your shadow attend only when the sun shines.

Short of Breath Dizzy, Sinking Spells COULDN'T WALK FAR

Mrs. L. A. Oliver, Granville Ferry, N.S., writes:—"A few years ago I had dizzy, sinking spells so bad I could hardly stand up without taking hold of something to support me, and I could not walk any distance on account of being so short of breath."

"I had taken a lot of doctor's medicine, but it did me no good, only for the time being, so reading in the D.H.B. I learned about

I decided to try them and found them to be just what they are recommended to be, and I feel that I owe my life to them."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

SUNDAY SCHOOL LESSON

FEBRUARY 12

JESUS PICTURES THE KINGDOM OF GOD

Golden Text: "Thy Kingdom come. Thy will be done, as in heaven, so on earth."—Matthew 6.10.

Lesson: Mark 1.14, 15; 4.1-34. Devotional Reading: Psalm 145. 7-13.

Explanations and Comments

1. The Growth Of the Church Of God Is Sure: It Depends Upon God, verses 26-29. A definition of the phrase, the Kingdom of God, can only be gleaned by studying the various ways in which Jesus used it. In His parables we learn that it has to do with man's spiritual nature and possibilities, his inner life. We might define it as the reign of God in the hearts of men: "The Kingdom of God is within you," said Jesus.

There is no geography in the Kingdom of God. On an ancient Syrian fragment the familiar words of Luke 1.33 read, "and to His Kingdom there shall be no frontier": it is for all the world and for every creature. There is no chronology in the Kingdom of God; it is both present and future. As Alexander MacLaren writes: "It is present wherever wills bow to God; it is future as to complete realization, in a heaven from whence it comes and to which, like its King, it belongs even while on earth." In the earthly province of the Kingdom its subjects are fighting the good fight; in the heavenly province they have gained their crowns of righteousness.

A parable is a story told for the purpose of illustrating a truth. The parable of "The Seed Growing Secretly," or of "The Blade, the Ear, the Full Corn," as it is also sometimes called, portrays the slow but sure growth of the Kingdom of God in the hearts of men. "So is the Kingdom of God," thus Jesus begins his parable. That is, what you see to be God's method of working in nature is also His method of working in the spiritual realm. So is the Kingdom of God, as if man should cast seed upon the earth (as Jesus and the Apostles and His later followers have implanted the word of God in men's hearts); and should sleep and rise night and day, that is, lead his customary life, leaving the result of the sowing with God; and the seed should spring up and grow, he knoweth not how. "The Kingdom of God cometh not with observation," Jesus told the Pharisees.

It Bids Pain Begone.—When neuralgia racks the nerves or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

Recipes For This Week

(By Betty Barclay)

LEMON JUNKET BAVARIAN

- 1 package lemon junket.
- 1 tablespoon powdered sugar.
- 1/2 cup chopped walnuts.
- 1/2 teaspoon almond extract.
- 1 pint milk.
- 1/2 pint cream.
- Marshmallows.
- Tart jelly or cherries.

Cut marshmallows in quarters with shears and place in bottom of dessert glasses. Whip cream, almond extract and sugar together until stiff, add chopped walnuts. Warm milk slightly, in separate dish, dissolve in it the junket powder, quickly pour this into the cream mixture, stir a moment carefully. Pour at once into the glasses. The nuts and marshmallows will rise to the top. Let set until firm. Then chill. Top with bits of tart jelly.

Scalloped Ham and Potatoes

Into a well-buttered pan put slices of raw peeled potatoes and a little pepper. Then a layer of uncooked, sliced ham. Add another layer of potatoes and ham and pour on thin cream sauce (1 tablespoon flour, 1 tablespoon butter, to 1 cup milk). Sprinkle bread crumbs on top and bake in a moderate oven until brown and potatoes are well done. Serve hot. Just enough ham can be used to give the desired flavor, which has the advantage of making a little ham go a long way. For picnics this can be baked at home in a heavy tin dish with a cover and reheated over hot water on a camp fire.

Extending Hudson Power

During the year 1927 hydro-power equipment was installed in Canada ready for operation to the extent of more than 221,000 h.p. In addition other undertakings were advanced to such a stage that a further total of 378,000 h.p. will be in place during the first six or seven months of 1928, thus bringing the total by the middle of the year to more than 5,109,000 h.p.

for Coughs and Colds

A Pleasant Sip—Instant Relief

There is an effective way to pleasantly relieve that distressing Cough. Buckley's Mixture is delightful and "friendly". Yet it acts like a flash in clearing the throat and chest. One dose stops coughing—and there are 40 doses in a 75-cent bottle! All druggists sell it under a money-back guarantee.

W. K. Buckley, Limited,
142 Mutual St., Toronto 2
BUCKLEY'S MIXTURE
Acts like a flash—single sip proves it.

A scientist says that the next war will be fought with insects. He seems to be under the impression that war is a picnic.

Sore Back.

Drive away the pain by massage with Minard's.

Cork was first used for bottle stoppers between 1680 and 1715 by a monk of the Abbey of Haut Villers, France.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. It seldom fails.

Nellie Grant, daughter of President Grant, married Captain Sartoris in the White house in 1874.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic; or constipation; or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Children Cry for

Fletcher's CASTORIA

MANITOBA'S NEW LIQUOR BILL IS FINALLY ADOPTED

Winnipeg.—With but brief debate, Manitoba's new liquor bill, which provides for the sale of beer by the glass in hotel parlors and clubs, and the purchase of hard liquor under a cash-and-carry system from Government commission stores, was adopted in the Legislature.

The act probably will be proclaimed February 15, Hon. W. J. Major, Attorney-General, stated recently. Preparations for opening beer parlors are well under way by hotel men in city and rural districts, and extensive alterations have been made by some in fitting their premises in accordance with the new act.

Under the act, provision is made for taking a local option vote in the 23 "dry" constituencies of the province.

The Manitoba Liquor Commission is given wide powers under the act, and severe penalties for infractions are provided. The Government will take all liquor profits, instead of dividing them with the cities and municipalities as at present, and has the right to purchase or build a brewery, if conditions warrant.

Stories Are Discredited

Talk Of Semi-Tropical Land In Northern B.C. Is Largely Fiction

Ottawa.—The making of aerial maps is resulting in a greater influx of prospectors to Canada's many mining fields and is a time-saver for company organizers, A. H. Narraway, chief aerial survey engineer of the topographical surveys, told the convention of Dominion land surveyors here.

Mr. Narraway declared maps being made through the use of aerial photography were actually the best and most accurate obtainable.

Talk of newly discovered semi-tropical land in Northern British Columbia which was said to be kept warm through the eruption of hot springs was largely fiction, according to a report read to the delegates by K. P. McCusker.

Speaking of a recent survey he conducted in the northern stretches of the Pacific coast province, Mr. McCusker said he had found luxurious meadows and prairie land and large stretches of open country which he termed "summer-land." It could not be classed as semi-tropical, however, the speaker declared. The country abounded in game, goats, sheep, caribou and grizzly bear. Grass grew to such a height that it was clear no heavy snow fell during the winter.

Reveals Operations Of Smugglers

New York.—A confession of Florent Lamotte, a sailor, has revealed the operations of the diamond gang, which has smuggled hundreds of thousands of dollars worth of diamonds from Europe during the past year. He confessed to bringing 55 packages of diamonds into New York last year. Arrested last November, Lamotte had \$100,000 in diamonds concealed in the heels and toes of his shoes.

Dairy Production Declines

Calgary.—Tremendous prosperity among the farmers of Alberta, following remarkably successful seasons for grain growers, was held by Hon. George Hoadley to be partially responsible for the serious decline in dairy production which had been observed in the province last year. Mr. Hoadley was addressing the manufacturers' section of the Alberta Dairy-men's Association 23rd annual convention.

Would Outlaw Submarines

Washington.—A demand that the submarine be outlawed as a weapon of naval warfare was made in the House, Tuesday, by Representative Frothingham, Republican, Massachusetts. He proposed that the nations of the world unite in abolishing the submarine and prohibit its construction.

The three largest hotels in the world are the Pennsylvania and the Commodore in New York City and the Stevens in Chicago.

New Governor Installed

James McNeill Takes Over Administration Of Irish Free State

Dublin.—Escorted by a troop of Free State Cavalry, James McNeill, new governor of the Irish Free State, went to Leinster House where the chief justice administered the oath of office.

The cavalry escorted Mr. McNeill and his wife, who rode in a motor car over a route of three miles to the viceregal lodge.

There was no demonstration en route and the spectators were drenched by a heavy rain.

After the oath had been administered Governor-General McNeill was presented to all the high Free State officials and their wives and then went to Leinster Lawn where his first public act was to place a wreath on the cenotaph there in honor of the Irish patriots, Arthur Griffith and Michael Collins.

Timothy Healy, the retiring governor-general, had quietly vacated the viceregal lodge overnight with his daughter, driving to his old home in Chapelizod on the banks of the Liffey.

Land Surveyors In Convention At Ottawa

Report Of Summer's Work Is Given To Government

Ottawa.—After months spent in the uninhabited or sparsely settled sections of Canada, the Dominion land surveyors are here to compare notes, exchange experiences and to lay before the Government and the people of Canada the result of their summer's work.

When the convention opened about 100 surveyors and engineers took part. R. W. Cautley, of Edmonton, the president of the association of Dominion Land Surveyors, occupied the chair. His address was the feature of forenoon's meeting.

The tremendous area in Canada which still remains practically unexplored and unknown was emphasized by Mr. Cautley.

"No surveyor has ever set foot on the greater part of Canada," he said, "and less than one-quarter of our wonderful country has ever been adequately mapped out or can be until the surveys are made."

Other Nations Would Like Canadian Envoy

Would Mean Admittance Of Canada To Pan-American Union

New York.—Although members of the Canadian Government have stated that the Dominion will not take the initiative in applying for membership in the Pan-American Union, a special dispatch to the Herald Tribune from its correspondent at Havana indicates that Canada would be speedily admitted, provided she extended her diplomatic connections to several Latin American countries.

Described as "curious developments running under the surface," the dispatch says: "Unofficially a suggestion has been made to persons who would transmit it to the proper Canadian authorities, that if the Canadian Government would send diplomatic representatives to Chile, Argentina, Brazil, and Mexico, as she has done to Washington, she would be speedily admitted to the union."

Form New Federation

Winnipeg.—With 200 Hungarians present, the Federation of Canadians of Magyar Descent was formed at a convention here. Dr. John Ujvary, Regina, was elected president and Nicholas Istovnyffy, Hamilton, Ont., secretary. The objects of the federation are to create citizenship organizations which would make the descendants of Magyars who came to the Dominion full-fledged Canadians, assist them in land development work and aid in philanthropic and charitable operations.

Canadian People Confident

Halifax.—"I am struck by the note of confidence which Canadian people have regarding the future of this Dominion and also by the enlargement of knowledge which you have regarding Canadian resources, both agricultural and mineral," declared Rt. Hon. L. C. M. S. Amery, Secretary of State for the Dominions, in an interview at Government House, where he was entertained during his brief stay in the city.

President of Irish Free State

Liam T. Cosgrave, head of the Irish Free State Government, who recently paid a visit to the United States and Canada.

Sees No Possibility Of Peace Department

But Resolution Will Start Debate Says Miss MacPhail

Windsor.—Terminating Toronto the "most reactionary city in Ontario," Miss Agnes MacPhail, M.P., speaking at the banquet of the Border Cities Business and Professional Women's Club, delivered a vigorous attack on war, its makers and planners.

Miss MacPhail said she had placed a resolution upon the order paper at Ottawa calling on the government to authorize the formation of a government department for the promotion of international peace and goodwill.

"We have a department that is doing all it can to promote the military spirit," Miss MacPhail said. "Why should we not have a department working to definitely promote the spirit of amity and international friendship? I know my resolution won't carry, but it makes excellent ground for debate."

Urges Sales Agency

Winnipeg.—Establishment of a national co-operative selling agency to handle the products of the various provincial organizations was advocated by C. B. Gooderham, Dominion apiarist, at the annual convention of the Manitoba Beekeepers' Association. Mr. Gooderham also urged Government standard grades for honey, and curtailment of the present price cutting and individual selling.

Strengthen Italian Army

Rome.—The Fascist militia will be incorporated into the regular Italian army in war time, Premier Mussolini announced. The announcement was made in the course of a review of the militia upon the fifth anniversary of its foundation.

Two Fliers—Air and Snow

F. Trubee Davison, assistant United States Secretary of War in charge of Aviation, is having a look at "Mountie," famous huskie with the Chateau Frontenac dog team, while his driver and owner, Arthur Beauvais, is answering questions. Mr. Davison is up at the Chateau Frontenac taking in the Quebec Winter sports season and Mountie is doing his bit towards making it a success. Whenever he appears in the lead of the dog team he draws all eyes, for Mountie used to lead the patrol of the Royal Canadian Mounted Police in the Far North and has earned the Victoria Cross, men say.

Pay Tribute To Senator

Present Portrait To Senator Desaulles To Commemorate Hundredth Birthday

Ottawa.—The remoteness and the nearness of those stirring events which have given their color to the history of Canada were strikingly emphasized when both Houses of Parliament, having adjourned for the occasion, a portrait of Senator Georges Casimir Desaulles was presented to him by his fellow parliamentarians, in commemoration of the 100th anniversary of his birth. Hon. Mr. Desaulles celebrated his centenary, September 29, 1927.

Hon. Hewitt, Boston, Speaker of the Senate, made the presentation in the Senate chamber.

Right Hon. W. L. Mackenzie King, Prime Minister, expressed his pride in having the honor to join with the Senate in congratulating Hon. Mr. Desaulles on the age he had attained and on the service given with such great distinction to himself, his province, and to his country. It would be of interest to all to know that in the rebellion of 1837 Mr. Desaulles, then a boy of ten, was placed under arrest and although not imprisoned, was put under surveillance for almost a year. Senator Desaulles at present had a distinct recollection of the stirring events of those days. His mother was a sister of Louis Joseph Papineau.

Hon. R. B. Bennett, leader of the Opposition in the House of Commons, associated himself and the Opposition with the Prime Minister's sentiments.

Ban On Export Liquor Houses

Lash Is Suggested As Penalty For Drug Peddlers

Victoria.—Discussing liquor legislation in the Legislature, Attorney-General A. M. Manson said the fight begun in 1922 had now borne fruit and export liquor houses were to be put out of business. In view of the unanimity in this respect among the provinces, he did not think the Senate would venture again to reject the legislation, as had been done twice before after it passed the House of Commons.

He was hopeful also, he said, that the Federal House this year would adopt the British Columbia suggestion that the lash be added to the penalties for drug peddlers.

Order American School Closed

Constantinople.—The government has ordered the American school at Broussa, Turkey, closed on the ground that it has broken Turkish law by converting students. The government recently investigated the school after it had been reported that four Moslem girl students had been converted to Christianity. The Turkish law prohibits its religious propaganda in the schools.

PRAYER BOOK REVISION IS STILL A LIVE QUESTION

London.—The controversy here over the Church of England prayer book continues unabated.

At a meeting of the London Diocesan Association of the Federation of Catholic Priests, an Anglican body, a resolution was passed urging the whole question of the revision of the prayer book should be postponed until after the Lambeth conference of 1930. The resolution declared the bishops' amendments in the deposited prayer book were not likely to commend themselves either to the Anglo-Catholics or the Evangelicals, and it pointed out there were churches in communion with the Church of England that had not yet been consulted with regard to the alterations in liturgical standards.

Lord Halifax, a leader in the Anglican conversations, insisted on a similar measure of freedom being accorded the Church of England as is now enjoyed by the established Presbyterian Church of Scotland. He expressed the belief that if the people of the church united on this they could command success, but that otherwise they would remain powerless.

These are anxious times for the church, said the Archbishop of York, speaking at the opening of a mission exhibition at Sheffield recently. "Those of us who are in a position to know, are aware that the decision to be reached next week in the church assembly may involve the whole course of history for the church of this land. We pray we may have the wisdom to discern God's purpose and the courage to follow it," he said.

Building Starts At Flin Flon

Bank Already Erected and Contract For Drug Store Let

Flin Flon, Man.—That the much talked of Flin Flon mine promises big business in the future is proven by the fact that the Royal Bank of Canada has built a branch there. This is the first business to be started since the taking up of the option, and the bank will be followed shortly by a drug store, the contract for which has been let.

The new Flin Flon hockey team has accepted a challenge from the Northland Hockey Association for a match during dog derby week, and this will probably be arranged. A first class rink has been built at the mine and the miners are busy practicing for the March date.

Youthful Burglars Captured

Two Gangs Are Rounded Up By Winnipeg Police

Winnipeg.—Two gangs of youthful burglars, members ranging in age from 14 to 19 years, and totalling 11 in number, have been rounded up by police recently. One gang devoted its efforts exclusively to stores and residences in the west end of the city, while the other gang operated over a wide area in Manitoba and Saskatchewan.

The first group of youthful bandits was gathered in by police as the result of an investigation into a series of store robberies. The second coup was made when the youths were surprised by police while in the act of robbing a local drug store.

Naval Men Go To England

Winnipeg.—On their way to England to man the new destroyer, "Tormentor," and bring her back to Canada, three officers and 61 petty officers and men of the Royal Canadian Navy, passed through Winnipeg recently on the Canadian National Railway. They will sail from Halifax on the steamship Lapland. The sailors are from Esquimaut and were the crew of the "Patriote."

Had Completed War History

London.—The Daily Sketch said that it was understood that the late Earl Douglas Haig had completed a history of the great war. The book was said to have contained more of the secret history of the conflict than is now available, and Earl Haig decided that it should not be published during his lifetime. It is believed that he left implicit instructions how the book should be dealt with.

One Result Of The Immense Tourist Traffic In Canada Is A Revival Of Home Industries

One extraordinary result of the immense tourist traffic to Canada is the revival of home industries which in some cases have not been practised to any great extent for many years. Thus along the St. Lawrence River, in Quebec, in Nova Scotia, Prince Edward Island, and New Brunswick, rug-weaving is again flourishing. The visitors to Canada naturally desire to take home with them something of unique design or individual charm which cannot be obtained at home. They desire also something which has an attachment to and is representative of the country they have toured. Rugs especially are much appreciated, and in scores of homes, capable fingers are executing the designs of 50 or 100 years ago while there is great rivalry in the creation of new and artistic patterns representative of the country and atmosphere in which the workers live.

The age of machine production has meant a sacrifice of individuality and for certain purposes the home-made article, rough though it may be, is preferred to the regularity of design and the precision of the machine made counterpart. While home handicraft is likely to flourish from now on in Canada, says the Department of the Interior, through its Natural Resources Intelligence Service, it is unlikely that established factory industries will suffer because the home-fabricated article will be sold to a customer who would not buy a factory product. In many cases tourists carry away with them things which they had no intention of buying but which have caught their fancy and are bought on the spur of the moment.

There are instances in Nova Scotia where in small villages as much as \$2,000 was realized last summer from the sale of home-woven rugs. Everyone who has travelled along the St. Lawrence Valley has seen plentiful exhibits of the work of the French-Canadian housewife and her family. Along sections of the road from Montreal to Quebec, hooked and woven rugs, homespun blankets and scarves are hung over almost every balustrade in midsummer. In Prince Edward Island there has been a pronounced revival of home handicraft work in which the Women's Institutes have engaged by organizing the work for the benefit of the women country-folk.

In one section of the island woven flax work is a particular specialty and in parts of Nova Scotia, the art of spinning from flax is as much alive as it was a century ago. In some instances flax is grown, spun and woven into linen sheets or towelling or rugs without leaving the farm.

In wool, whether it is the habitation of Quebec, the Acadian of Nova Scotia or the Scotch of Cape Breton Island, there is an equal facility in taking the fleece from the sheep's back and putting it on the man's back or into rugs. Incidentally it may be remarked that many of the dyes being used in rug manufacture in Eastern Canada are home-prepared. Onion skins, berries and bark are among the ready sources of coloring matter and it is said that the brew concocted by steeping the skins of onions imparts a delicate rose coloring to the material which is dyed with it.

The spinning wheels in use in Canada are of many patterns and they are to be found from coast to coast, in styles originating in the highlands of Scotland, in England, in Brittany and even in Czechoslovakia. A. MacLeod, near Baddeck, in Cape Breton, has been weaving all his life and his homespun would pass for Harris tweed, except, as someone has remarked, for the absence of the peat smell, which reminds one that in Alberta, the Hebridean crofters of the Clan Donald Colony and other parts of the province, have recently launched into the weaving of Harris homespun. It is anticipated that hand looms will be in considerable use this winter and that the industry, which will be encouraged through the setting up of a carding mill by the Scottish Immigrant Aid Society, will be beneficial in ensuring contentment for the newcomers on the land as well as adding substantially to their revenue. In Saskatchewan and Manitoba the spinning wheel is no stranger in many homes and the Mennonites and Doukhobors have their particular variety of the ancient instrument.

Canada has a wide variety of home handicrafts and there are many articles of home manufacture to appeal to the tourist. Even the work of the Eskimo in the far north has been commercialized to some slight extent and the cribbage counters carved from the ivory tusks of the walrus are highly prized because of their rarity and exquisite workmanship with their embellishments in the way of engravings of animals and fish. The Indian work in basketry and birch bark, in beaded moccasins, gloves and jackets is well-known to all. Indian women have even made rugs too and in an exhibit of maritime provinces' handicraft at Springfield, Massachusetts, recently, there was shown a rug made by a Micmac Indian woman, 102 years of age.

Of the home handicrafts practised in Canada, the arts of spinning and weaving are the most widespread. Especially is this true of rural Quebec, where, according to W. H. J. Tisdale, manager of the Canadian Co-operative Wool Growers, not more than 500,000 pounds of a total wool clip of 4,000,000 pounds ever finds its way into commercial channels. The remainder is spun at home or woven into cloth in local community mills. However there are many other outlets than weaving for those who would profit from the trade opportunities brought to their doors through the ever-increasing flow of tourists to Canada. At a recent exhibition in Montreal, under the auspices of the Canadian Handicrafts Guild, hundreds of articles of home workmanship were on exhibit from all parts of Canada, ranging from household furnishings to bric-a-brac. From British Columbia and Ontario there was unglazed pottery in rich colorings and graceful lines. A lamp featuring a totem pole had been sent in from British Columbia, and there was basketry and wood carving from the coast province, embroidered linens and woven coverlets from the prairie provinces, wood carving in the way of inlaid trays, candlesticks, book-ends and lampsticks from Saskatchewan, showing what could be accomplished with the wood of native trees, while there were rugs, rag-matting and batik from all over Canada, but especially from the eastern provinces.

Home industries appeal especially to rural residents. To those who have an inclination for such work conditions are now decidedly favorable to the marketing of their products either by direct contact with the tourist or through the art and novelty shops which are springing up throughout the Dominion. Besides the revenue to be derived from such activities there is a great deal of satisfaction in the thought of having sent our visitors home with something which they will treasure throughout their lives and which will be a constant reminder of Canada.

Honey Crop In B.C.

Estimated Value Of Honey Production In 1927 Placed At \$217,078
The estimated value of the honey crop of British Columbia in 1927 is \$217,078, and the estimated value of bees wax produced \$5,000. The capital value of bees, hives, supers and other apian equipment in the province reckoning 18,708 hives at \$25 each is \$467,700. The Okanagan, Shuswap and Thompson valleys lead the seven districts into which British Columbia is divided for apian purposes, with a production of 416,949 pounds of honey from 4,737 colonies of bees—an average of 88 lbs. per hive.

Saskatchewan China Clay
Saskatchewan deposits of china clay at East End are being developed, according to the Hon. A. P. McNab. The clay has proven ideal for the manufacture of china, he says. It is shipped to Medicine Hat for manufacture. At Estevan another clay suitable for manufacture of floor tile is under development.

Somehow badness is far more contagious than goodness.

Apple Orchards In North

Fruit Successfully Grown Near Highest Peak In Canadian Rockies
Apple orchards well "North of fifty-three" may be pooh-poohed by many, but the raising of apples in such latitudes has been accomplished and British Columbia has the honor of having the most Northerly orchards in the British Empire, if not in the world.

These orchards are located in central British Columbia, along the line of the old Grand Trunk Pacific Railway, a district that recently demonstrated that it can raise alfalfa, clover and grain, despite the fact that the temperature sometimes goes down to 50 degrees below zero.

One of the most interesting achievements in apple growing is that of Edward Walsh, whose orchard is at LeGrand, North of McBride, less than 100 miles from Mount Robson, the highest peak in the Canadian Rockies. The elevation there is 2,370 feet. Last season Walsh shipped 90 boxes of apples from the hardy trees in his orchard.

Trade With Latin America

Possibilities Of Canada Extending Trade With Central and South America Are Favorable

In an effort to extend Canada trade with the Latin-American countries, the Department of Trade and Commerce has in view the possibility of inaugurating steamship services between this country and the countries of Central and South America. A Canadian Trade Commissioner's office will be established at Lima, with jurisdiction over Peru, Bolivia, and Ecuador, and the Department will furnish the newspapers of South and Central America with a constant stream of news from Canada. These announcements were made by F. C. T. O'Hara, Deputy Minister of Trade and Commerce, who has just completed a 14,000 mile trip through South and Central America, Mexico and Cuba.

Wheat Rust Problem

Varieties Of Wheat Possessing Rust Resistance Have Been Developed By Crossing

Real progress has been made in the solution of the wheat rust problem of Western Canada. Dr. J. E. Harrington, of the University of Saskatchewan, told the Saskatchewan Agricultural Societies' Association Convention, at Regina. He said varieties of wheat possessing rust resistance in varying degrees have been produced by crossing. Again it has been found that the effects of rust can be considerably reduced by treatment with kila, which is 300 times as effective as a fungicide than ordinary sulphur.

Fisheries In Lead

Canada's fisheries carried on in the waters of two oceans, the Atlantic and the Pacific, and upon a system of great lakes and inland waters stand in both quantity and value among the leading fisheries of the world.

Irresponsible Public Utterances Produce Conditions That Cause Nations To Drift Into War

It seems rather hopeless sometimes to hold faith that the forces of goodwill and good sense in this world can make headway against some sorts of madness which seem to flourish in it. We are not very sure, to take the latest instance in the news, that Senator Borah can do very much by his protest against what he calls the "sheer madness" of those American rear admirals who have lately been beating the patriotic tom-toms of the United States in behalf of a big, bigger and biggest navy. But the senator is right in his description of this business, and he is right to do what he can to prevent it. And it is everybody else's business—unless they are mad, too; and no matter how hopeless it seems—to support the hand of any public man who is trying to keep his head amid the senseless rumors of war which now agitate our world.

Rear Admiral Plunkett has been telling the National Republican Club in New York City that the United States is nearer to war than ever it was before; and that this war is inevitable because "war is the penalty of commercial and industrial efficiency." So, says the rear admiral, the thing for the United States to do is to build the greatest navy in the world in the shortest possible time. And he is backed up by his senior officer, Admiral Hughes, who says the thing to do is to build a billion-dollar navy.

Senator Borah is not too emphatic in his protest. He says that nothing is better calculated to bring about war between two great nations than competitive naval-building policies, coupled with statements like these of the rear admirals, that war is inevitable.

"These statements," says Senator Borah, "put out by naval officers, are notice to all the world, and particularly Great Britain, to get ready for war. They are being so interpreted throughout the world."

Senator Borah is quite right. There is no place in all the world where such talk as that of Rear Admiral Plunkett's is more irresponsible or more mischievous. It would be bad enough if that "commercial and industrial efficiency" he speaks of as the possession of his country were in any danger of serious challenge in any quarter. But the obvious fact in the world since the Great War is that the United States has enjoyed the greatest economic expansion and commercial prosperity ever known in history. There is nothing the United States has any real use for that it could gain by war. There is nothing it could not gain much easier by peace. War talk in the United States is indeed "sheer madness."

Nevertheless, and this is very relevant to the question of madness, we think Senator Borah is wrong when

he says: "All this is part of a well-organized plan to prepare the public mind for an avalanche." If this means as it seems to mean, that war mongers are actively plotting war, we think it is nonsense. The essential madness of this war talk is its very irresponsibility. We do not think the rear admirals are meeting in back rooms to cook up schemes for bringing on a war. The fact is that nations drift into war. And they drift into war, not knowing why or how, on a current of idle talk and windy rumor, which might never have been anything at all, if it had been dammed—and dammed—as it should be, at its source.—Vancouver Province.

A Practical Bathrobe

This smartly simple bathrobe would be comfortable and warm if made of velveteen, striped or plain flannel or wool crepe, and is a style the home modiste will find quite simple to fashion. There is a long shawl collar, patch pockets, and the set-in sleeves are finished with deep pointed cuffs. No. 1703 is in sizes 6, 8, 10, 12 and 16 years, 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 3 1/2 yards 36-inch, or 2 1/4 yards 51-inch material; 3/4 yard 40-inch contrasting; 3/4 yards binding. Price 25 cents the pattern.

Every woman's desire is to achieve that smart different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centres and will help you to acquire that much desired air of individuality. Price of the book 10 cents the copy.

Alberta Oil Development

Oil operators in the Alberta field are formulating plans for the greatest year of development in the history of the industry in this province. All the companies plan intensive operations, the Imperial leading with a program calling for the drilling of at least ten wells.

"Are you still engaged to that somely Smith girl?"
"No, I'm not."
"Good for you, old man. How did you ever get out of it?"
"Married her."

Encouraging Home Crafts

The revival of an old industry is shown and greatly appreciated by interested spectators. Another revival of this kind will be given soon at Quebec, while others will be held in Banff and Vancouver.

Don't suffer with rashes, eczemas or irritations when Cuticura Soap and Ointment will quickly relieve and heal. Bathe with Cuticura Soap and hot water, dry and anoint with Cuticura Ointment. Nothing quicker or safer than Cuticura Soap and Ointment for all skin troubles.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 15c and 50c. Talcum 5c.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XVIII.—Continued

They were in the kitchen. Mrs. McMann peeling a tub of potatoes for the evening slaughter, and Helmi dampening clothes for the next day's ironing. The latter lifted her dreamy eyes from the basket of clothes. "Ain't clean clothes beautiful?" she said, "all full of nice smells of good air and sun. I like clean clothes like flowers."

Mrs. McMann regarded her with a puzzled look. "Sometimes I wonder about you, Helmi, dear," she said kindly, "you seem so queer, and hardly all there. You don't seem to hear what people are saying to you—with your dreamy looks and the queer things you say."

"Were you speaking to me, Mrs. McMann?" Helmi asked politely. "I am sorry if I did not answer right. What was it you wanted me to tell you?"

Though outwardly pleased to have Helmi back again, Mrs. McMann's anger burned against the girl because of the fervent expression of joy her return brought from the men. Devout thanksgiving was expressed the first day she was there to wait on the table.

"Helmi at the helm again?" one little Jew cried out. "Don't leave us, Helmi—we missed you so! Don't leave us even if you did get married; we're willing to forgive you anything but desertion. 'Gosh, I'm glad to see you,' said the time-keeper, a man who seldom spoke."

"See here!" Mrs. McMann broke in, "what's the matter with you all? Didn't I feed you?—Darn you! Didn't I sling grub here every day and hire a Chinaman to cook?"

"It's just we're glad to see her back—she's a pretty, young thing, and we like to look at her, Mrs. McMann," said the mine boss, whose special duty it was to keep peace. His wife had gone East and he was taking his meals at the boarding house. "The boys don't mean no harm to you."

Mrs. McMann's eyes narrowed. Helmi's agile movements, her boyishly slim figure, her perfectly rounded face, and the brilliancy of her color-

ing, gave her the same shock of bitterness the old actress feels when her theatre shakes with applause for the new star. Mrs. McMann, in her young days had "queened" in many a camp, where the youngest woman always travels next the pole. Now, by contrast with Helmi, she was merely a grindy-gray, stout old woman, withered and battered by time, in the sight of men—and she knew it, and with the thought came a smouldering hatred of the unconscious cause of it.

One day when Helmi came in Mrs. McMann noticed the color of her cheeks was not so brilliant, and her eyes looked heavy and red.

"Frettin', are you Helmi?" she said; married three months and frettin' already. That's not good—no man is worth frettin' over. By Gosh! I'll bet Jack's not frettin'. If there's a pretty girl in sight, Jack will be spar-kin' up to her and makin' her think she's the only girl he ever looked at. Men are all the same—don't I know them! I should, I've had three men already. But I'm done—I wouldn't marry the richest man in the world, not if he went on his bended knees to me."

Mrs. McMann, with her hair in flaring curl papers, dressed in a faded and shrunken old wrapper which had lost some of its buttons in the course of its career, with shoes unlaced and the tongues hanging out, did not look much like the lady who would command abject homage.

Some such thought as this must have shown in Helmi's face, for Mrs. McMann went on. "I was good enough lookin' when I was your age, too, and had lots of fellows crazy about me. I made my first mistake when I got married and began to raise a family. Then I lost my looks and my figure. Lord! ain't the world hard on women. It's just like the potatoes that are planted in the ground—the old one has to die to make a new plant. The old one rots, while the new one springs."

Helmi shuddered. "That's bad talk," she said hesitatingly. She wished she could have said it in her own language. "God made the world this way. It can't be as bad as you say. Lots of good men there are, and happy women, too, and it's all right for women to have families."

"Oh, you don't say so?" snapped Mrs. McMann. "I suppose the next thing we hear—"

Here the conversation was interrupted by old Sim's arrival. Having slept all day, he had come in for his evening meal, blinking at the light like a bear in the Spring.

Simeon Maskerville was a long, lanky man of uncertain age. His gray beard was tangled and knotted, but his eyes were young still, and, although generally half closed, as if the light hurt them, capable of seeing all that was happening. Simeon had the appearance of a flower that has grown stringy and pale for lack of light, or a potato that has lain in a forgotten corner of the cellar. He fell at once to talking, not wishing to lose any of the precious hours of conversation, remembering that the long night was coming wherein no man would be found to whom he could talk.

"Speakin' o' false teeth," he began, although no one had been speaking of them, "I lost my job with the C.P.R. over mine. I was engineer on the flyer when it happened, and happenin' to sneeze, out they flew into the grass. Just natcherly I stopped the train—Stars! I would have done as much for anyone—no man could do less than stop! and I hops down, for I had marked the place, and I walks right to them, dusted them off on my elbow, and puts them in. It didn't take no time. But the company was sore. The

chief heard of it and calls me in. I often wish I hadn't been so hasty—anyway I quit, I says to him, I says 'No man can talk that way to me and get by with it.' I spoke easy and gentle, like I always do, but it seemed to cut him to the heart. He just couldn't stand it from me. When I was goin' out, head up, I thought I heard him call. I never turned—maybe I should 'uv—I don't know."

"The C.P.R. seems to have got along all right since you left, Sim," said Mrs. McMann, testily.

"So have I, Mrs. McMann," said Sim, gently, "beautiful—never out of work—always a place for old Sim. I've had to rough it a little some times—catin' at queer joints sometimes—associating with odd sticks here and there—that's the worst; but even at that I manage. I do not mind like some people; memory, my dear Mrs. McMann, of dear, dead days, though forever gone, can be very sweet, and I like to see the happiness of other people. Now here's Helmi and Jack, I'm that happy over those two kids, it seems like it brings all back to me. It was springtime when Martha and me went off and surprised everyone. Springtime in old Ontario, when daff little lambs were springin' up and down on their crooked little legs, and the air was full of that blue haze that trails on the trees like rag; and the frogs in the ponds were saying 'Is to-morrow come yet?' You know the story, don't you, Mrs. McMann, of how the frogs was coaxed to go in for one day to the pond, and promised they would sure get out tomorrow?"

"Oh shut up, Sim, and eat your supper—I can't be bothered to listen to you."

Helmi looked up quickly. "I like Sim's talk," she said, "he says good words."

"He's just an old plaster, Helmi, and would rather talk than eat if he can get anyone to listen to him. He's like the canal-boat back home—the engine always had to stop when the whistle blew—that's Sim."

"But I like it," Helmi said again; "He talks kind. Tell me about the frogs, Sim."

"Some day I'll come to see you, an' I'll tell you, Helmi," Sim spoke with dignity now. He had been assailed professionally and could not recover all at once.

"He's trying to bun a meal, Helmi," said Mrs. McMann brutally; "I know him."

"Come on Sunday for dinner with me, Sim, and then you can tell me," Sim nodded gratefully.

"It is the long black nights, Helmi, black without a star, silent, empty, not a voice, not even a dog-bark. I have been a night-watchman for ten years—no wonder I have a cravin' for voices and friends. Yes, I will come, Helmi, and thank you for being so kind."

Helmi's heart grew tender as she thought of the lonely old man sitting alone in the long dark night, stark with silence; for although she had been only two weeks alone, she knew what loneliness and fear a night can hold when one lies open-eyed, staring into the black unanswering depths, wondering, wondering. One can imagine such terrible things of lost men in trackless wildernesses. And Christmas seemed far away!

(To Be Continued.)

Under Patronage Of Prince

His Royal Highness Sponsored Publication Of Canadian Birdland Poems

His Excellency Viscount Willingdon has accepted a copy of W. Havelock Robb's volume of Canadian Birdland poems, "The Quill and the Candle," which appeared just before Christmas under the patronage of His Royal Highness the Prince of Wales.

The Prince has acknowledged the arrival at St. James Palace of the volume of poems, the original command for which he gave last June.

The "Command" copy was an example of the Canadian binders art. It was done in green suede, gold and red with silk inside the covers and the presentation inscription inside was in gold lettering on suede.

Post Offices In Canada

In addition to 12,370 post offices in Canada, there are 3,751 rural mail routes on which are 199,470 mail boxes. The Canadian post office system embraces a territory more extensive than that of any other system in the world except the United States and Russia.

COOL AND FRAGRANT

A Boon For Motorists

Swedish Doctor Invents Spectacles As Protection Against Glaring Headlights

Soon you may be able to drive at night undisturbed by the glare of oncoming headlights. A new kind of "specs" made especially to protect motorists' eyes, from blazing lights, has been invented by Dr. Carl G. Bostrom chief medical officer of the Swedish navy. The spectacles are a clever combination of a German type of glass, greenish-yellow-gray in color, that shades into clear glass at the bottom of the lenses. The upper part shields the eyes from irritation; the lower permits unobstructed vision on the road for driving.

Little Helps For This Week

"He that is slow to anger is better than the mighty; and he that ruleth his spirit than he that taketh a city." —Prov. xvi. 32.

Let each man raise
The self by soul, not trample down the self;
Soul is self's friend when self doth
rule o'er self.
—Song Celestial.

Alberta's Coal Production

Coal production in Alberta last year was the largest ever, reaching a total for all grades of 6,933,755 tons. Figures compiled by the mines branch show that 1927 went 27,832 tons ahead of the best previous year, 1926, thus establishing a record.

Life's current coin is made of plain common sense.

Toronto's Population

Toronto's population is estimated at 569,899 in the report of the city assessors, just issued. This is an increase of about 13,000 for the year.

GREAT PRAISE FOR BABY'S OWN TABLETS

The Dr. Williams' Medicine Co., have received the following letter from Mrs. Griffith, of 21 Merchison Ave., East Hamilton, Ont., concerning her experience with Baby's Own Tablets:

Dear Sirs.—I wish to thank you for the handy little booklet you sent me on the Care of Children. My baby boy was six weeks old when I first used Baby's Own Tablets, being new to Canada but since the first proof of their many uses in bringing up a family, I have never been without them, for they are worth their weight in gold. There is no trouble in getting the little ones to take them and they often prevent an illness if taken in time. My first baby is now, at the age of four and a half years, a picture of health, and my nine-months-old baby is also well and happy. They are both a real good sample of what Baby's Own Tablets can do, for I have never yet needed a doctor for either of them."

The booklet to which Mrs. Griffith refers is entitled "Care of the Baby," and treats with what a mother ought to know for baby's sake. A copy of the booklet will be sent free to anyone requesting same from The Dr. Williams' Medicine Co., Brockville, Ont.

In the matter of bank salaries, the question is: "Should a teller tell?"

YOUNG WOMEN SUFFER MOST

These Two Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Ayer's Cliff, Quebec.—"I have been teaching for three years, and at the end of the year I always feel tired and have no appetite. I was a awful sick each month too, having pains in my back until sometimes I was obliged to stop working. A friend recommended Lydia E. Pinkham's Vegetable Compound to me and I heard many women telling how good it was so I thought it would help me. And it did. Now I take six bottles every year and recommend it to others." —DONALDA FANTEUX, Ayer's Cliff, Quebec.

"Unable to Work"

Canning, Nova Scotia.—"I had irregular periods and great suffering at those times, the pains causing vomiting and fainting. I was teaching school and often for some hours I would be unable to attend to my work. Through an advertisement in the papers I knew of Lydia E. Pinkham's Vegetable Compound, and it has been of great benefit to me, the troubles being completely relieved." —LAURA J. EATON, Canning, King's County, Nova Scotia.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

ED. J. ROULEAU,
Editor and Publisher

In last week's issue of The Chronicle there appeared an article from the Financial Post regarding the Wright Flexible Axle. We were confronted by Mr. H. A. Wiertz following publication day (Mr. Wiertz is Sales Manager for the Province, as we learned later) and he stated that the article was untrue and that this article was not as it appeared in The Financial Post. We won't argue the point; we copied the article word for word from The Worker, which is published in Toronto. But the reason for publishing this account was because considerable stock was being sold in and around Carbon, and if there was any truth in the article it is our bound duty to our readers to let them know of the situation. If this article was not the truth it is a challenge to the Wright Corporation and the matter should be taken up immediately and not left to do more harm, and as long as the Financial Post is credited with the article they are directly responsible for the outcome.

The following is an article which appeared in the Montreal Gazette of January 23, 1928, under the caption: "Eastern Canada's 1928 Motor Show Opened by Mayor."

Mayor Martin, in officially declaring the show opened, informed the gathering that a new automobile factory is to be opened in Montreal on Feb. 15. He mentioned the new venture in general terms only in his speech. When approached afterwards for further information, he said that certain local interests had organized and were pre-

paring to introduce a new Montreal made car to the public of Canada. He said that the factory would be located on Notre Dame St., and thousands would be employed."

Now this address is where the New Wright Corporation is supposed to have their new factory and on the 15th of this month we presume the factory is to open its doors. Whether or not the Wright Flexible Axle is a safe investment only remains to be seen and proven after that date.

Here and There

The "Never-Rot" potato, a variety planted in Yarmouth and Digby counties, Nova Scotia, this year, is reported as showing up to its name, coming through flood damage practically unharmed.

United States farmers receive about 15 cents a bushel less for their wheat than Canadian farmers, because of higher railway rates, according to Senator Brookhurst of Iowa, speaking at Washington recently.

The Liard River district in the extreme north of British Columbia can produce excellent crops of grain and vegetables, it is stated by the Department of Agriculture of British Columbia, following experiments carried out in conjunction with the Royal Canadian Mounted Police. Specimens of grain have been received here.

Ocean tonnage to carry 36,000,000 bushels of Western Canadian wheat via the Pacific to the United Kingdom and Europe has been booked for November, December and January. During December alone tonnage for 20,000,000 bushels has been fixed and shipping men believe that a hundred vessels will be required for this.

"Indian Golf" will be a novel form of the Royal and Ancient game to be introduced this winter at the Chateau Frontenac, Quebec City, for the enjoyment of the winter sports tourists. The game will be played on skis and snowshoes, and over a course laid out in the snow. Targets will replace holes and bows and arrows will take the place of golf clubs and balls.

The Poultry Department of the University of British Columbia announces the sale of a white Leghorn hen for \$500. She is not the famous Hen No. 6, but F. 319 and was exhibited at Ottawa last summer. Last year she laid 335 eggs in 365 days; and as she weighs just four pounds her purchase price was \$125 per lb. F. A. Sansome, of Greenwich, Conn., was the purchaser.

The Government's final crop estimate is now: Wheat, 444,000,000 bushels, as compared with an estimate of 458,000,000 in September and last year's actual yield of 409,000,000; oats 452,000,000 bushels as against September's estimate of 502,000,000 and last year's actual yield of 383,000,000. Barley is put at 98,000,000 bushels as against 99,000,000 last year and rye at 16,000,000 bushels against 12,000,000 last year.
